ECAP- Engineering College Automation Package

➤ Introduction to ECAP:

ECAP stands for Engineering College Automation Package. It is designed and developed by Uniques software solution pvt. Ltd. Bangalore, Karnataka, . ECAP aims at immediate availability of data in required formats to ease the work of staff and management and increase in transparency and accountability in administration

➤ Benefits of ECAP:

Campus automation software enables institutions of higher learning including colleges to manage admission and learning processes. They are designed and developed to provide real help in managing enrollment of students; attendance; monitoring faculty; providing fee details; scheduling assignments; grading students according to their performance and maintaining library.

The world is fast moving towards e-learning and all the institutions of higher learning are fast adopting the process of learning through the web. We help other institutions in adopting the latest technology. Our objective is to help remove the obstacles that other institutions could come across during the technology adoption process.

Ours is a comprehensive web based software with a multitude of user-friendly features all included in a very responsive design. The software would help in managing the entire system from academics to administration in a hassle free manner. The automated system allows teachers, students, parents and administrators to remain in touch with each other. It is for better communication and services.

➤ About UC-School management

- Attendance Management
- Course management
- Examination
- Fee Management
- Syllabus and Lesson planner management

- Assignment and Homework Management
- Timetable Management

➤ Attendance Management

There is no need to maintain the conventional method of registering the arrival of students and employees on a registration booklet since the teachers as well as an administrator can do the same on the digital devices like smartphones and computers with the assistance of our UC-School software system. This attendance management facility in the UC-School system helps teachers focus more on teaching activities than doing such paper-based administrative work.

- Tracks student's attendance status.
- Generates attendance percentage report.
- Generates cumulative attendance report.
- Day-wise/ subject-wise attendance report.
- Manage and track employees' attendance status.
- Alerts parents on their children's attendance status.

➤ Course management

The UC-School software system helps the administrator to configure the different courses and the batches as per his wish. The students and the teachers in an institution can be classified into a list and their respective details/data will be safely maintained in a sophisticated cloud-based system. This module takes care of all the tasks related to academic management and accomplishes it precisely.

- Assign subjects to the batches.
- Add and view a section and a subject.
- Update and delete a section and a subject.
- Activate and deactivate a class and a section.
- Can effectively manage classes, sections and subjects
- Add, update and delete a student as well as a staff details 5- Assign subjects to the batches

➤ Examination

The UC-School's Examination-management module supports a management in handling the front and back-end examination processes perfectly and it lets the users fetch examination related details at any time. This module generates the exam-wise report, subject-wise report, consolidated report, combined report and reports based on a student ranking and his attendance status.

- Marks and grade entry.
- Configure different set of examination.
- Print grade cards, merit list and transcripts.
- Automatic percentage and average calculation system
- Automatic generation of exam-wise and subject-wise reports

➤ **Fee Management**

The UC-School's fee-management system makes the fee payment as well as the fee management processes extremely transparent and secure. This module provides a fast and efficient way to perform financial transactions and which generates financial reports that will help a school management in gaining the financial insights on managing the costs and the expenditures.

- Manage different fine types.
- Manage different fee category.
- Can easily find the fee defaulters.
- Supports different fee-payment mode
- Transparent payment-transaction system
- Has a separate channel for collecting tuition fee

➤ **Syllabus and Lesson planner management**

The UC-School software system offers a platform for the teachers where they can interact the school management directly in order to strategize a better syllabus and lesson plan. This method of making the teachers interact with the school management while constructing a lesson plan supports the teacher to cover all the portions in a subject in a best possible manner.

- Design lesson-plan online.
- Prepare an ultimate and a comprehensive syllabus.

- Strategize different syllabus for different grades.
- Store data such as topic, lesson objective and other details digitally.

➤ **Assignment and Homework Management**

The 'Assignment and Homework' module of the UC-School software system lets a teacher assign homework effortlessly to students. A teacher can assign a task to all the students in a specific class as well as can assign it to a specific student in a specific class along with certain rules. If a student submits an assignment on time successfully will get 'submitted' status while he does not submit the assignment on time will get 'Not submitted' status and his/her parents will be informed the same through the SMS.

- Maintains students' homework and assignment status.
- Attach external documents along with the assignment.
- Informs parents and students regarding the assignment.
- Finds out the students who are not submitted the assignment on time.

➤ **Timetable Management**

Create clear and error-free timetable within few minutes to ensure the best utilization and optimization of the teaching staffs as well as the non-teaching staffs of your institution. The updated or changed time chart of a class can easily be published on the dashboard of the corresponding users for their attention.

- Manages subjects and its allocation.
- Day-wise, week-wise and month-wise timetable.
- Alerts on subject limit while creating the timetable.
- Can set a timetable for weekdays and can set class timings.
- Informs an employee's availability while creating a timetable
- Alerts when a teacher assigned to more than one class at a time

➤ **Modules are as follows:**

1. ADMINISTRATION
2. FINANCE AND ACCOUNTS
3. STUDENT ADMISSION AND SUPPORT
4. EXAMINATION

➤ NPR COLLEGE OF ENGINEERING AND TECHNOLOGY LOGIN HOMEPAGE

➤ **STUDENT ADMISSION AND SUPPORT**

➤ **ADMISSION MODULE**

Admission module helps in the admission process. The process involves interacting with students and providing authentic information to the students. Our objective is to develop the software that can take the hassle out of the process and make it more user-friendly. While online submission of documents can solve the problem to a greater extent, our software goes a step ahead in helping the administrative staff in processing the applications, Admission module consists of the following sub modules.

- **ADMISSION**
- **ADMISSION REGISTER**

The screenshot shows a web application interface for an ERP system. The browser address bar indicates the URL is npr-cet.ac.school.com/syllabus/syllabusimport.html. The page title is "COMPUTER SCIENCE & ENGINEERING". There are three buttons at the top: "Add New Lesson", "Switch course", and "Switch semester". Below these, a blue header bar reads "COMPUTER SCIENCE & ENGINEERING - CSE - 3-YEAR - SEM 5". A green "Import Syllabus" button is visible on the right. The main content is a table with columns for "Lesson", "Topic", and "Action".

Lesson	Topic	Action
MA8551 Algebra and Number theory		
GROUPS AND RINGS	Groups: Definition, Properties, Homomorphism, Isomorphism, Cyclic groups, Cosets, Lagrange's theorem, Rings, Sub rings, Integral domain, Field, Integer module, Ring homomorphism	X
FINITE FIELDS AND POLYNOMIALS	Rings, Polynomial rings, Irreducible polynomials over finite fields, Factorization of polynomials over finite fields	X
DIVISIBILITY THEORY AND CANONICAL DECOMPOSITIONS	Division algorithm, Base, Irreps, representations, Number patterns, Prime and composite numbers, GCD, Euclidean algorithm, Fundamental theorem of arithmetic, LCM	X
DIOPHANTINE EQUATIONS AND CONGRUENCES	Linear Diophantine equations, Congruences, Linear Congruences, Applications, Divisibility tests, Modular exponentiation, Chinese remainder theorem, linear systems	X
CLASSICAL THEOREMS AND MULTIPLICATIVE FUNCTIONS	Wilson's theorem, Fermat's little theorem, Eulers theorem, Eulers Phi functions, Tau and Sigma functions	X
CS8591 Computer networks		
INTRODUCTION AND PHYSICAL LAYER	Networks, Network Types, Protocol Layering, TCP/IP Protocol suite, OSI Model, Physical Layer, Performance, Transmission media, Switching, Circuit-switched Networks, Packet Switching	X
DATA-LINK LAYER & MEDIA ACCESS	Introduction, Link Layer Addressing, DLC Services, Data-Link Layer Protocols, HDLC, PPP, Media Access Control, Wired LANs, Ethernet, Wireless	X
